

Louis B
31

REGION

Antwerp - Brussels - Leuven - Ghent - On Remote

PROFILE

Hello,

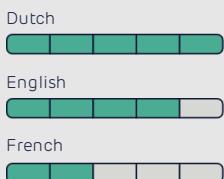

My name is Louis. I consider myself an ambitious, hardworking man who thrives when having a positive impact on customer's software. I'm a quick-learner who always tries to be responsible with the tasks and responsibilities that were given to me. Furthermore, I've built up several years of professional experience with extensive theoretical & practical knowledge as a consequence.

Development Profile: Full-Stack

- TDD
- Design patterns

PROFESSIONAL BACKGROUND

03.2018 - 11.2022

Employee
Software Developer
Rentio NV

Rentio NV

Employee
Software Developer

Description: In my previous job at Rentio NV we created an online portal for managing and automating Real Estate administration between tenants and landlords. I worked as a backend nodeJS developer, I was partially responsible for the database architecture. Although most of my work went into processing data from our Web applications and serving data via various filters, integrating http request and handling webhooks between us and ICT systems of big customers, integrating with payment provider apis like Mangopay, sending push notifications to Android and iOS apps, I occasionally did some UI updates to our internal React application used by our support team.

Technologies:

- AWS: Lambda, CloudFront, ElastiCache (Redis), Step Functions, RDS, EC2, SQS, SNS
- Databases: MySQL, MongoDB
- Other: Google Cloud Messaging, Mangopay, Sendgrid/Twilio
